Ultra-fast internet, wherever you are

Starlink plans with RHM

As an authorised reseller of Starlink products, we're pairing access to Starlink's high-speed business internet with RHM's dedicated support.

rhm

Keeping you connected

Say hello to instant business internet

Starlink's business-grade internet provides high-speed, low-latency internet through SpaceX's satellite network, providing reliable connectivity even in remote areas.

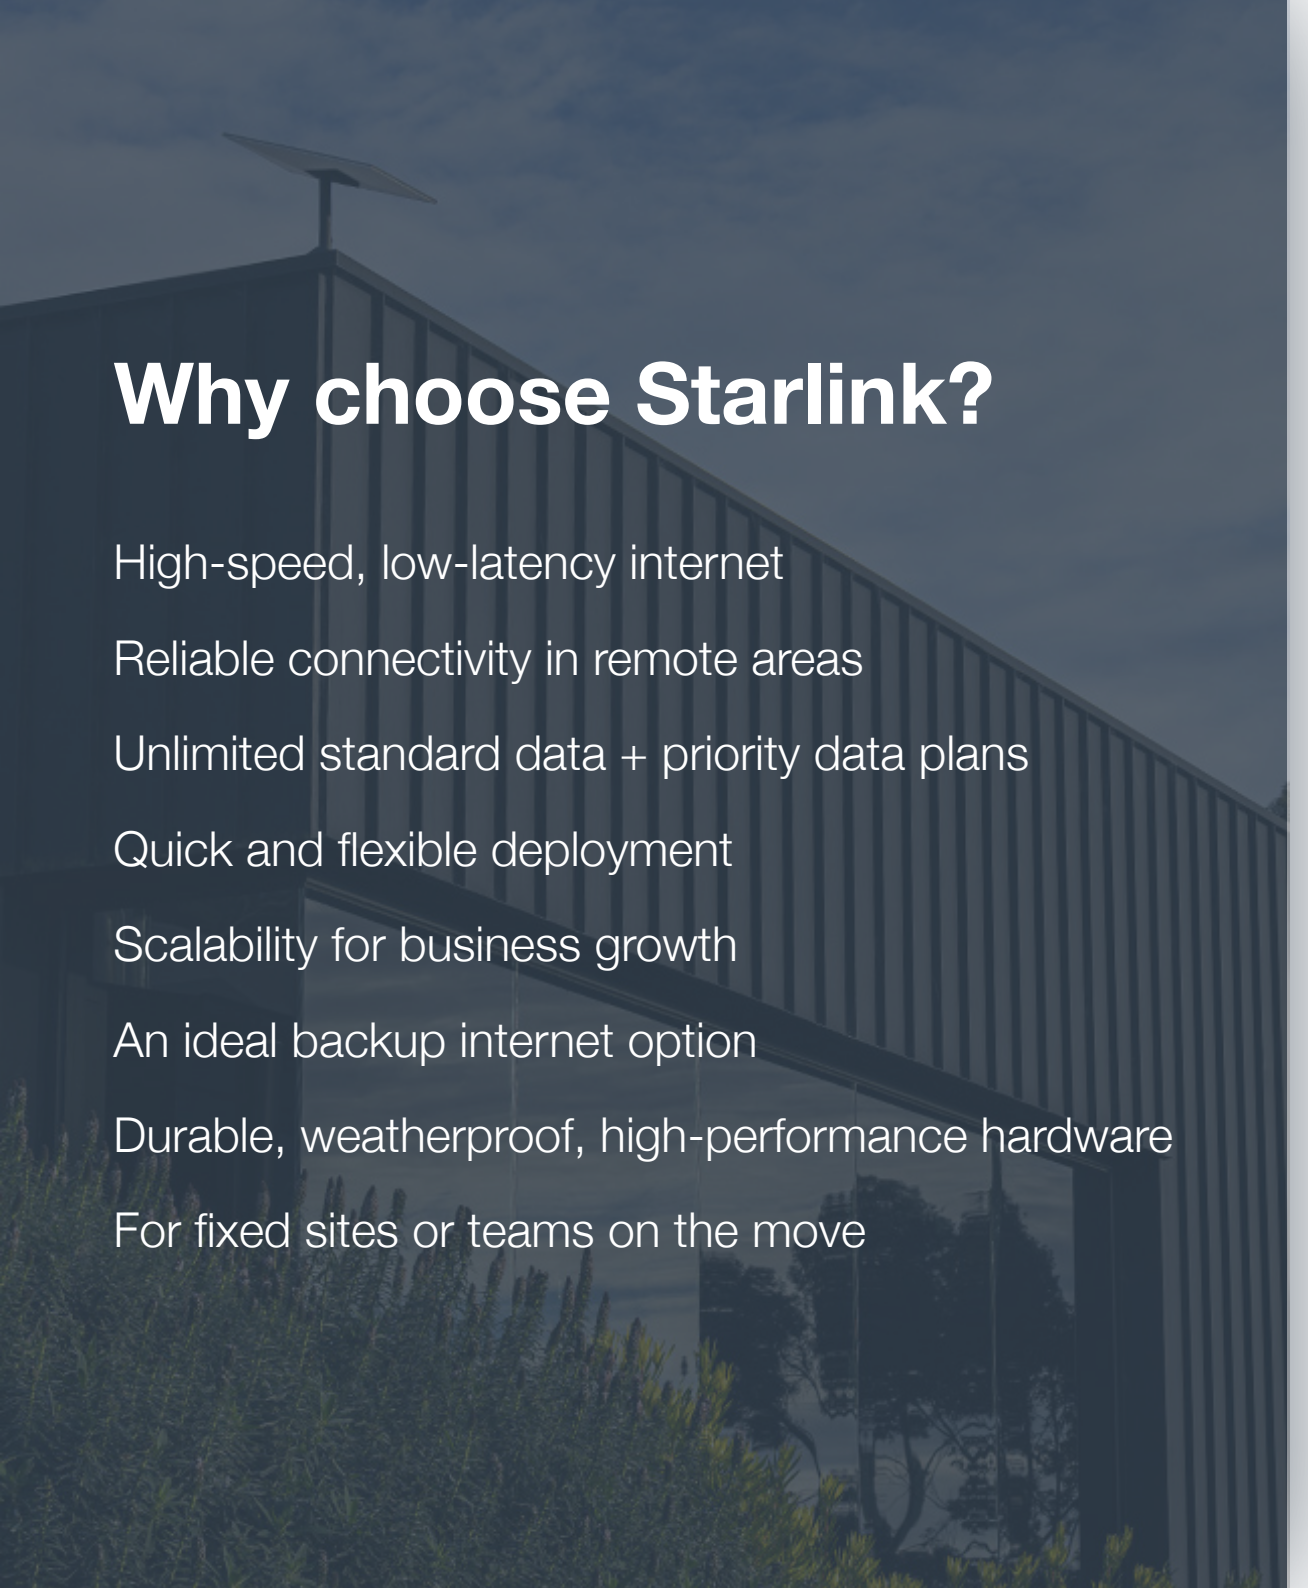
Ideal for businesses in underserved regions, it helps keep your operations running and your team connected, providing access to cloud services.

Starlink plans with RHM

Starlink business internet is designed for businesses in remote, rural, or underserved areas where traditional internet options are limited or unreliable.

- Businesses in remote or rural locations
- Businesses in areas underserved by fibre networks

Starlink solutions are ideal for industries that rely on stable internet access for remote work, field operations, or real-time data management. Example industries include agriculture, construction, maritime and energy.



Why choose Starlink?

High-speed, low-latency internet

Reliable connectivity in remote areas

Unlimited standard data + priority data plans

Quick and flexible deployment

Scalability for business growth

An ideal backup internet option

Durable, weatherproof, high-performance hardware

For fixed sites or teams on the move

What's in the box?

Starlink dish (your antenna)

Internet router

Power supply

Mounting tripod

Cables
